AWARD WINNING DISCOVERY CENTRE

Demco worked closely with Hampshire County Council architects and designers on the layout and design of the shelving for this award winning* Grade II listed Discovery Centre located in the heart of the cultural quarter of Bristol.

Demco used GPS technology to exactly pinpoint the position of each shelving bay in its circular layout. Sleek, white Wilsonart panels give a crisp finish to the shelving, which is in three shelf depths: 300mm, 250mm and 225mm to house a range of stock.

Attention to detail extended to using Colour Core laminate with colour throughout so no unsightly edges, on tables tops and other surfaces. As a contrast to the smooth, clean, cool look of the adult areas Demco designed their bespoke curved shelving for the childrens' library. In warm, bright orange the shelving, combined with unusual kinderboxes, completed the **WE'RE KIDS AND DIFFERENT** look.

Richard Mitchell, Demco Interiors: "This library is a testament to the expertise of our project management team and the creativity of our designers to interpret a challenging brief. It has been the whole hearted commitment of everyone involved with this project that has led this outstanding award winning library"

**Winner Public Library Building Award, Architecture meets Practicality 2009, presented at the PLA Conference, Bristol.*
