

ENVIRONMENTAL POLICY

WF Education (Projects) recognises its responsibility to protect and preserve the environment. In our interactions with the general public, customers, employees, regulators, and neighbours, we strive to reflect our commitment to improving environmental performance and respect the sustainability of our natural resources.

WF Education (Projects) will environmentally manage its activities to minimise any potential impact 'so far as is reasonably practicable'. We will actively involve all of our employees and take the lead in promoting environmental best practice, and we commit to continual improvement as an organisation.

Our environmental policy and has full Top Management and company support at all levels to ensure that we will:

- Set specific, achievable, and measurable objectives as part of the continual improvement of our management system
- Meet the requirements of ISO 14001:2015 and, where improvements are required we will aim to achieve within the shortest possible timescale.
- Monitor the outputs and emissions of our activities to ensure they eliminated, effectively controlled or reduced to meet or exceed compliance obligations, to prevent pollution and protect the environment.
- Audit and appraise regularly to ensure best practice
- Review this policy if new techniques become available or if legislation changes that affects our understanding.

Paul Finnie

Managing Director
